

everything you've ever wanted to know about IP Anycast+ SECURITY

presented by 

DDoS Hurts

The threat of DDoS attacks is rapidly rising with the number of reported attacks **DOUBLING** in the last year alone

AN AVERAGE ATTACK COSTS COMPANIES

50% OF BUSINESS OWNERS HAVE SUFFERED FROM A DDoS ATTACK

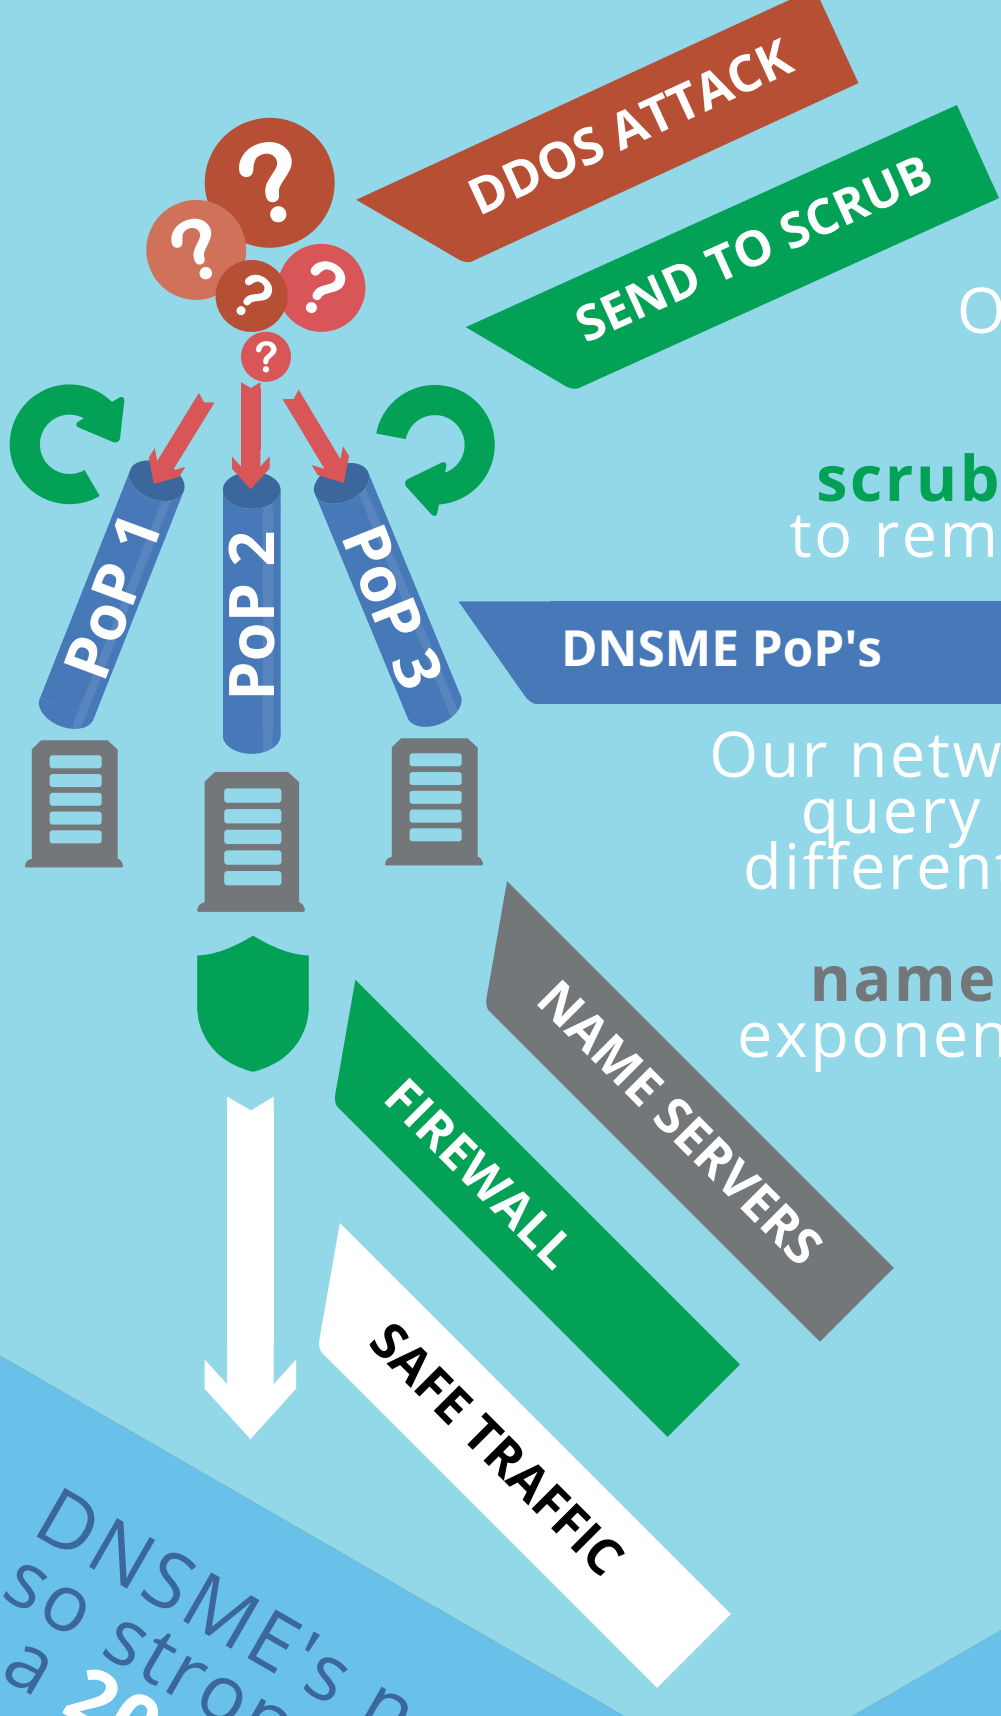

Most victims use an **in house** or **Unicast** DNS network with minimal bandwidth

DDoS ATTACKS CAN COST UPWARDS OF

Our Solution

Our IP Anycast+ network uses proprietary **scrubbing facilities** to remove bad traffic

Our network distributes query traffic to many different **PoP's**, in turn hundreds of **name servers** which exponentially decrease server load

DNSME's network is so strong it held off a **200 gbps** attack

... that was the **largest** recorded attack of its time

Check out our new **White Paper** Benefits of DNSME's IP Anycast+ network for more information
