

everything you've ever wanted to know about

IP Anycast+ SECURITY

presented by 

DDoS Hurts

The threat of DDoS attacks is rapidly rising with the number of reported attacks **DOUBLING** in the last year alone

AN AVERAGE ATTACK COSTS COMPANIES

114k
DOLLARS

50% OF BUSINESS OWNERS HAVE SUFFERED DOWNTIME FROM A DDOS ATTACK

75% OF ATTACKS ARE MOTIVATED BY NIHILISM OR VANDALISM

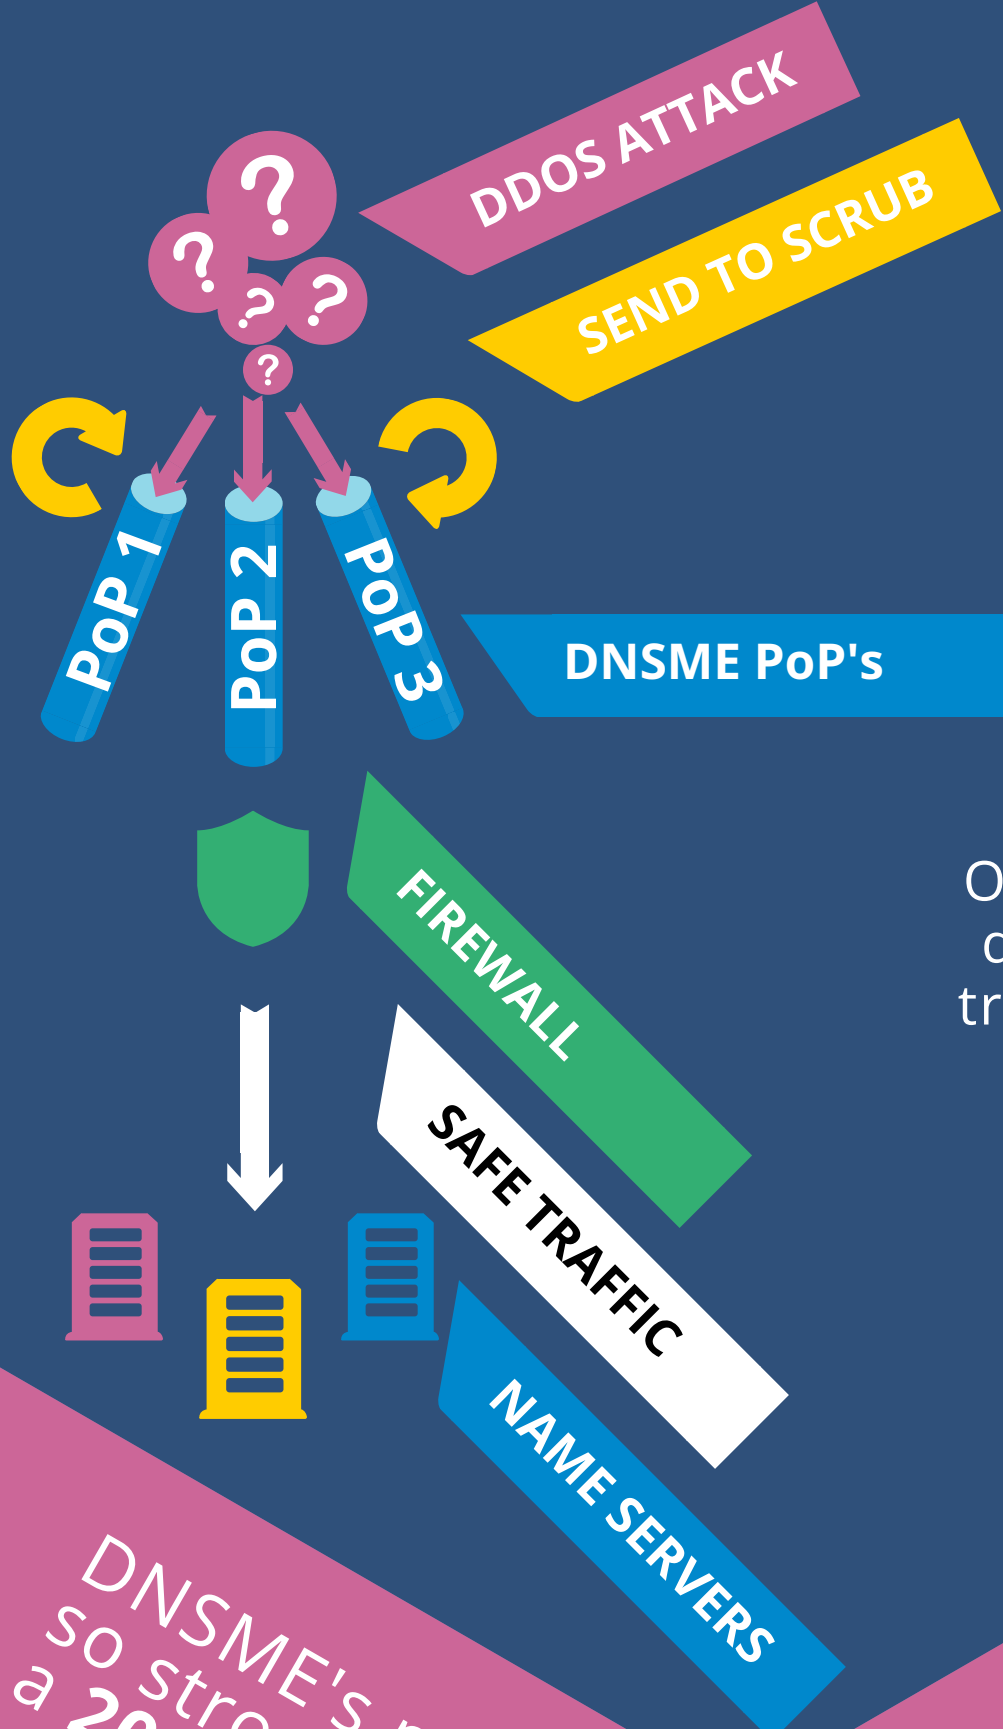

Most victims use an **in-house** or **Unicast** DNS network with minimal bandwidth

DDOS ATTACKS CAN COST UPWARDS OF

40k
PER HOUR

Our Solution

Our IP Anycast+ network uses proprietary **scrubbing facilities** to remove bad traffic

Our network then distributes query traffic to different PoP's, which distribute to hundreds of name servers

DNSME's network is so strong it held off a **200 gbps** attack

... that was the **largest** recorded attack of its time

Check out our new **White Paper** Benefits of DNSME's IP Anycast+ network for more information
